Konica Minolta
bizhub PRESS C8000/C7000 Series
bizhub PRO 1200
Best Production Line of the Year

- Simitri Toner features smaller, more uniform toner particles for spectacular imaging with superior fine detail
- User-friendly, extremely intuitive 15" color touch-screen display for full system and job monitoring as well as on-board document preview/review, making document file management quick and simple
- Features a wide variety of finishing options including multi-position stapling, saddle stitching, perfect bind, high-capacity stacking, and a great variety of folding options
- Prints on a wide variety of sizes (as large as 13" x 19.2") and stocks (as heavy as 350 g/m²), features auto duplexing with paper in weights up to 300 g/m², to produce dual-side prints and copies
- bizhub PRESS C8000/C7000 Series can be configured with three different image controllers, Konica Minolta, Fiery and Creo, to allow for a wider array of options and choices for the user
- bizhub PRESS C8000/C7000 Series Image Density Control (IDC) sensor offers real-time density adjustments; provides accurate color density control with the new density balance adjustment mode
